DETAILED ACTION

Applicant's request for reconsideration of the finality of the rejection of the last Office action is persuasive and, therefore, the finality of that action is withdrawn.

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 1, 2, 5-7, 11-16, 32-35, and 38-41, are rejected under 35 U.S.C. 102(e) as being anticipated by Sitrick (7,157,638).

Sitrick discloses a musical performance self-training apparatus for supporting a player by displaying a performance instruction information on a display means, comprising: a unit designating means (715) for designating a unit from the plural units (105) (column 17, lines 15-24), the units (105) constitute a music to be performed and each unit includes a predetermined size of musical tone information, and a performance instruction information generating means for generating the performance instruction information based on the musical tone information of the unit which is designated by the unit designating means (column 17, lines 25-43).

Sitrick discloses the musical performance self-training apparatus, further comprises a lesson menu generating means for generating an image information of a lesson menu which has a score of the music to be played and the units corresponding to the score, then output the image information to the display means, wherein the unit designating means designates a unit automatically, which unit corresponding to the score of the performance instruction information to be displayed next (column 19, lines 3-6, 16-24; column 19, line 63 – column 20, line 7; and column 26, line 26 – column 27, line 41).

Sitrick discloses wherein units having the same content are managed collectively as the same unit (column 26, line 26 – column 27, line 41).

Sitrick discloses an automatic and manual mode (column 10, lines 5-19), which allows control over the progress of the lesson distribution.

Sitrick discloses a musical performance judgment apparatus for evaluating musical performance (figures 2 and 13), wherein the judgment apparatus further comprising a performance result storage means for storing information relating to performance timing as a result of musical performance (column 25, lines 14-17); a judgment means (282/figure 2; and 1320,1330/figure 13) for comparing the information relating to the performance timing with the information relating to the performance timing included in the performance instruction and detecting the difference between these ; and an evaluation means (284,286/figure 2) for evaluating the performance, corresponding to the difference detected by the judgment means (column 11, lines 20-51; and column 25, lines 6-31).

Sitrick discloses the musical performance self-training apparatus, wherein a plurality of items are stored in the performance result storage means for each played note, as the information relating to the performance timing, and the evaluation means extracts the items evaluated best of the plurality of items with respect to all played notes, to evaluate the musical performance according to the mean value thereof (column 11, lines 20-43).

Sitrick discloses the musical performance self-training apparatus, wherein the information relating to the performance timing includes key-on time, key-off time, gate time and step time (column 20, lines 1-7; and column 21, lines 19-39).

Sitrick discloses the musical performance self-training apparatus, wherein the information relating to the performance timing further includes a value of ratio between the actual performance time and the performance time instructed by the performance instruction (column 11, lines 20-32).

Allowable Subject Matter

3. Claims 3, 4, and 8-10 are allowed.
4. Claims 17-18, 36, 37, 42, and 43, are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Response to Arguments

5. Applicant's arguments, filed 09/17/2007, with respect to the rejection(s) of claim(s) 1, 2, 5-7, and 11-12 under 35 USC 102(e) have been fully considered and are persuasive. Therefore, the rejection has been withdrawn. However, upon further consideration, a new ground(s) of rejection is made in view of Sitrick.
